General Features of the E-Toilet:-

- i) Structure of the toilet should be made of Stainless Steel (SS-304).**
- ii) Coin Validator System.**
- iii) Pre Flush, Auto Flush, Automatic platform cleaning mechanism to clean the toilet before and after usage.**
- iv) LED indications to notify the user about the status of the system.**
- v) Voice guidance to help the user to operate the toilet without manual assistance.**
- vi) Display boards where instructions in English, Hindi will be written for the aid of the user.**
- vii) In built water tank.**
- viii) Advertisement panels on which public messages, corporate advertisements can be displayed.**
- ix) GPRS Connectivity which will help in the monitoring the health**

status of the unit.

Broad Functional Description:-

The unit should have an Indian style closet, health faucet, lights, status display and instruction boards. The water tank shall be erected on top of the toilet unit. The tank shall be connected to the three flushes (pre-flush/platform washing/ after use flush) in the unit.

There should be display light outside the toilet unit, which shows whether the unit is ' Occupied ' indicating with Red Light or 'Unoccupied' indicating with Green Light. The user should be able to enter and close the door manually, similar to conventional toilet.

Upon entering the toilet, indoor lights should be switched on automatically; Pre-flush system shall wet the closet initially. Toilet flush can be activated using a manual flush cock provided inside the toilet. Even if the user forgets to flush after usage, the system should automatically flush after the exit. Exit from the unit should be completely manual. An automatic floor cleaning mechanism should be provided through which , the floor shall be cleaned automatically. The floor cleaning should be activated either through a push switch or it may be programmed to function after a specified usage.

Connected E-Toilet Infrastructure

E-Toilets should be connected over a GPRS network, which shall ensure real time monitoring of the usage and health status of the unit. The health status of the unit may be viewed and managed over a web interface for ensuring minimal downtime and standardized maintenance operations. A Service Engineer of the successful bidder must attend to technical trouble shooting of the e-toilets within 24 hours on lodging of complaint. The electronic system should be user friendly.
