Subject: Approval of 3 NGO/PP schemes as per National Guidelines for Partnerships-2014 under RNTCP

Role of NGO and Private Providers is important for successful implementation of RNTCP and overall comprehensive TB control program in the State. Government of India has recently revised the guidelines and came out with New Partnership guidelines. Considering the priority and feasibility in the State, NHM-HP has decided to go ahead with the implementation of three schemes initially, which are as follow; i) Designated Microscopy Centre ii) Improving TB in Urban Slums and iii) Sputum Collection & Sputum Transportation.

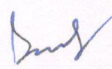

Implementation of other schemes will be considered in due course of time, depending upon the successful outcome of these schemes.

Hence, you are directed to identify the priority areas (both geographical and functional areas) and call the applications from NGO/Private providers for the partnerships through advertisement/online display on district website/ notice board of district health society.

Interested NGO/PP will apply for a partnership option to District Health Society strictly as per the specified Format. Once the NGO/PP is finalized for the partnership, an agreement/MOU to be signed within a month of approval of application.

Detailed Terms of Reference, Formats and Annexures are in the National Guidelines for Partnership- 2014 document (attached). Kindly be informed that the reference to this document may be made in context of the above listed three schemes only.

The undersigned may be informed on the action taken in this regards.

Mission Director (NHM)
