Dated Shimla

Office Order

19 MAY 2026
 April 2026

Tuberculosis (TB) mortality in India is primarily influenced by severe disease complications and coexisting comorbidities, including severe undernutrition, advanced HIV infection, diabetes mellitus, alcohol use disorder (AUD), smoking, and other chronic conditions. Among these factors, undernutrition is recognized as a major risk factor for early death during TB treatment, increasing the risk of mortality by 2-4 times. It also serves as an indicator of extensive disease and associated complications.

In order to review and analyze TB-related deaths in the district and to strengthen measures aimed at reducing TB mortality, a **State Level TB Death Audit Review Committee** is hereby constituted. The Committee shall review all TB deaths occurring in the state, The Committee shall also identify gaps in service delivery, recommend corrective actions, and promote cross-departmental collaboration to address socio-economic barriers and ensure accountability. The composition of the Committee shall be as follows:-
